SPECIALISED COATINGS

An external protection coat not only protects your car, but adds a superior level of high glass-like gloss to your car making it extremely attractive while also being immensely protective. Coatings like the Ceramic Coat exhibit extremely good weather resistance and stain-repellent properties. It enhances & increases the exterior life of the car while bringing back the lost shine that is always desired.

- CERAMIC COATING
- GLASS COATING
- FABRIC COATING
- TRIM COATING
- GRAPHENE COATING
- LEATHER COATING
- ALLOY COATING
- POLYMER COATING

Advanced coatings derived with nano-technology that help prevent environmental damages on your car's precious paint. These coatings form a 9H or 10H hard crystallised layer on top of your vehicle's clear coat and provide resistance against light scratches, chemical / acids and also protects the paint against harmful UV rays. You will also experience hydrophobic properties with the application of these coatings, which would avoid water markings to a great extent. These coatings are available with 3, 5 and 7 years application warranty plans

Choose from a range of Body, Wheel, Glasses and Plastic trim coatings here at Prime Detailers us by filling out the enquiry form and get your car ceramic coated today.

PAINT PROTECTION FILM (PPF) & BODY WRAPS

OFFICIAL DEALER OF

Want to change the way your car looks without hampering your original paint? Or protect your car's original factory paint from scratching & chipping? Our unique wraps & films are here to cater to all your vehicles needs. Whether it's a custom design you would like to install on your body or simply add a layer of protection, we do it all!

Famously known as PPF, this transparent high-gloss film is the most advanced and rugged protection that you can offer your vehicle. Afraid of being keyed by the neighbours kids, or just worried that your better half might scratch the bumper in the parking? Well PPF will help prevent almost all deep scratches and gashes with its thick layer of protection. We offer Self healing thermo-plastic polyurethane (TPU) PPF which completely heals all swirl marks or superficial scratches that appear due to improper washing. PPF prevents almost every possible scratch from reaching the paint.

Paint protection films come with 5, 7 and 10 year warranty plans. Choose from a range of Wheel, Glasses and Plastic trim coatings along with your PPF requirements, here at Brotomotiv. Contact us by filling out the enquiry form and get your car protected with PPF today.

PAINT PROTECTION FILM (PPF) & BODY WRAPS

OFFICIAL DEALER OF

NOTE

- The given warranty on the applied film is provided by the company (or brand) of which the product has been applied and final decision of claims lie with the brand.
- Considering Indian circumstances, minor dust specs may arise during application, but we make sure that we deliver the vehicle as per acceptable standards.
- PPF application includes a 2D film being applied on a 3D surface and thus the film has to be stretched at certain corners for best adhesion. Thus few stretch marks are unavoidable.
- We use the best branded TPU films which have self healing abilities. But this property works only on minor swirl marks that arise due to improper washing practices. Deep scratches don't heal but in most cases, PPF protects the paint from them.
- Due to age and oxidation, PPF just like anything else, ages and suffers environmental damage. With time, slight yellowness is unavoidable but unlike cheap quality PPF, this yellowness does not happen instantly.
- The adhesion of PPF is very strong and it may cause problems on re-painted panels, when removed. Although this risk could be reduced with good painting workmanship. Hence warranties are not applicable on repainted panels.
- PPF application is a complex process and depending on the size and shape of the panel, a few times we as applicators have to decide to put a joint on the film applied. We try to avoid this as much as possible but certain times it is mandatory.
